Please amend claim 8 to read as follows:

8. (amended) The test strip of claim 3, wherein the silica is [Cab-O-Sil TS610] <u>a</u> silica which has been modified by partial surface treatment with methyl dichlorosilane.

Claim 21, line 2, after "silica" insoft -- has--.

Please amend claims 33-35 to read as follows:

A disposable glucose test strip <u>comprising first and second</u> <u>electrodes</u> which produce[s] a current indicative of the amount of glucose in a sample applied to the strip in response to an applied voltage, wherein the amount of current generated <u>by the</u> <u>electrodes</u> in response to a given amount of glucose varies by less than 10 percent over a temperature range from 20°C to 37°C.

A disposable glucose test strip comprising first and second electrodes which produce[s] a current indicative of the amount of glucose in a sample applied to the strip in response to an applied voltage, wherein the amount of current generated by the electrodes in response to a given amount of glucose varies by less than 10 percent over a hematocrit range of 0 to 60 %.

A disposable glucose test strip <u>comprising first and second</u> <u>electrodes</u> which produces a current indicative of the amount of glucose in a sample applied to the strip in response to an applied voltage, wherein the amount of current generated <u>by the electrodes</u> in response to a given amount of glucose decays by less than 50% in the 5 seconds following peak current generation.

REMARKS

This is in response to the Official Action mailed January 23, 1997 for the above-captioned application. An extension of time to respond to the Official Action is requested, and the fee under 37 CFR § 1.17(a) is enclosed. The Commissioner is authorized to charge any
